**CUSTOM 3D EMBLEMS**

# The Newest Branding Technology

Our finely textured & dimensional custom emblems take your branded apparel to the next level.

Whether you want an understated matte look, or a shiny metallic color, we can create a custom look for you.

# Eye-catching Textures

The logo on your corporate apparel should match the high quality of your brand. These unique textures can help you achieve that.

## FabricForm Vs. Embroidery

Both logos to the left are the same size. (.75" tall )

As you can see, the lines of the FabricForm emblem are perfectly smooth with crisp, straight edges. The embroidered lines appear zig-zagged and a bit messy, in comparison.

# Mirrored Chrome

The logos on your shirts, hats, and bags can have the look of metal with the flexibility of thin plastic. There are few other ways to achieve this branded look.

## Details. Details.

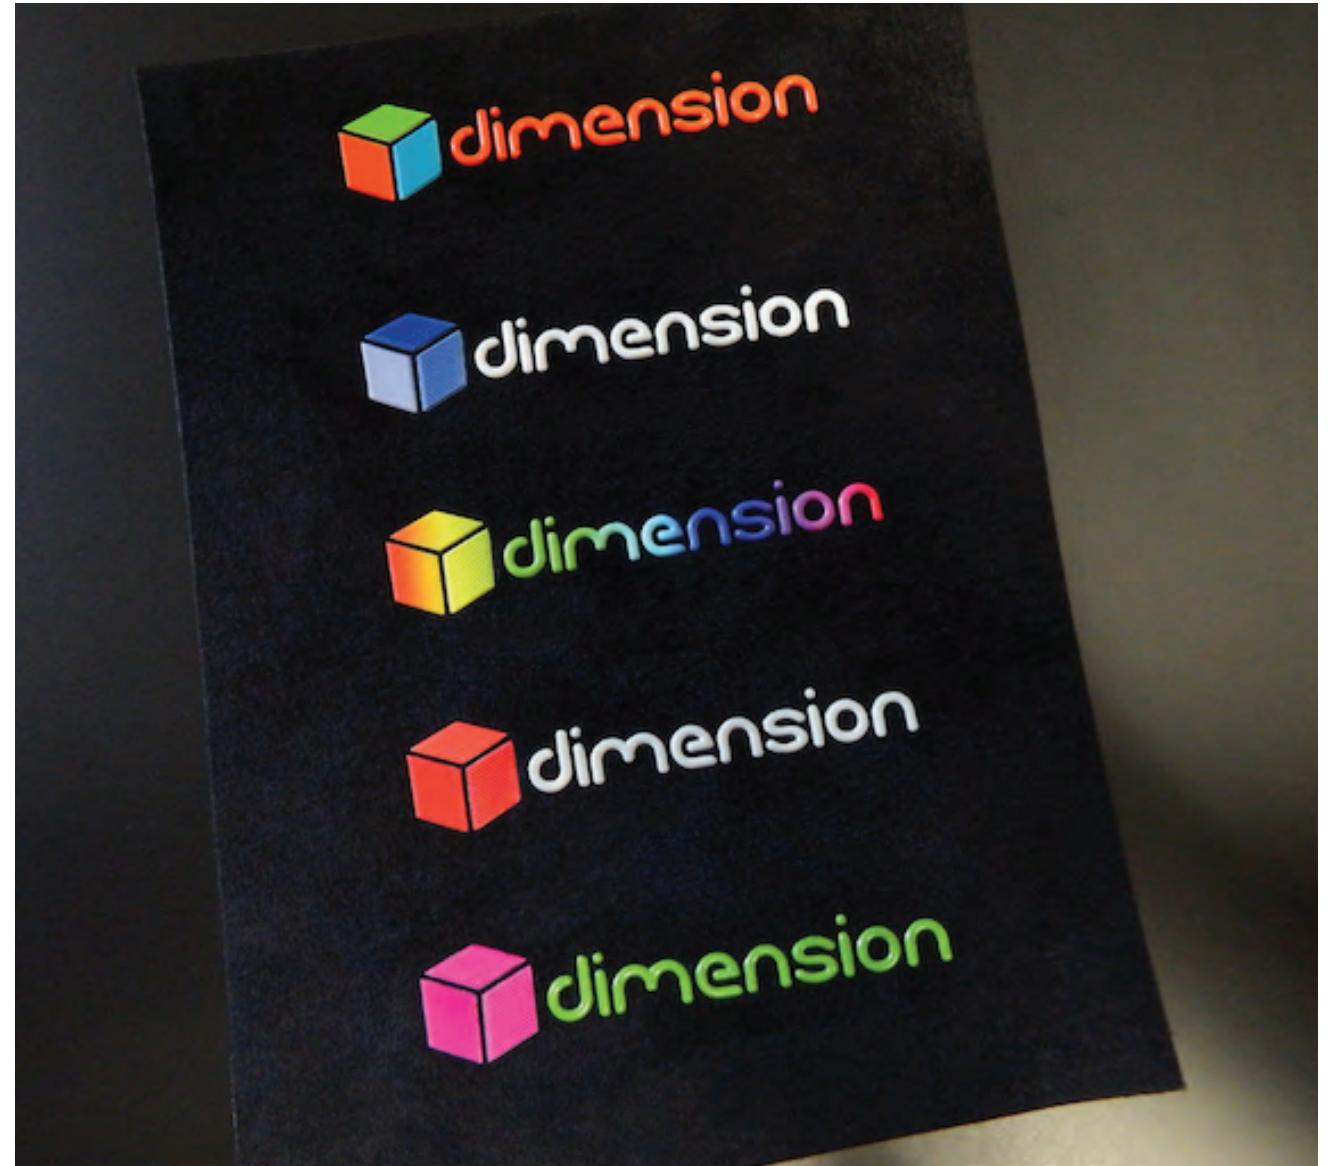

Tiny text is hard to read with some decorating techniques. We offer beautiful detail that looks great at any size. This logo includes text that is crisp and legible at 1/16" tall.

# Get creative

FabricForm allows you to create fantastic color blends.

You also can mix and match color options within a single order.

# Easy application

Your decorator can easily apply your new emblems using a standard heat press. If you don't have a decorator, we can recommend one.
